- The database is run on a separate server when using two or more servers. Thus, appropriate client tools for the database must be installed on the Web/Application server or servers when using a configuration with two or more servers.
- Certified configurations are fully tested and supported. Compatible configurations have not been tested but should function properly.
- Small-Scale Oracle 9i is not supported with Sun Solaris 8.
- Microsoft SQL Server Standard Edition is supported. However, Blackboard recommends Microsoft SQL Server Enterprise Edition because it supports expanded memory and includes valuable database management tools.
